

ANTONIO MARTINS DE SOUZA NETO

Junior Back-End Developer | .NET / C# / ASP.NET Core

Curitiba – Paraná – Brazil | martinsdesouza2005@gmail.com | github.com/AntoniOMsn | linkedin.com/in/antoniomartins-neto | antoniomsn.github.io/Portfolio

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience building REST APIs in C#/.NET and ASP.NET Core, including JWT authentication, Entity Framework Core, and relational databases (SQL Server, PostgreSQL, Supabase). Currently working as a Commercial Analyst, applying SQL and process automation to large-scale data analysis. Builds self-directed projects to consolidate back-end development best practices and intelligent automation with AI (N8N). Seeking a Junior Back-End/.NET Developer role to add value from day one.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, HTML, CSS, Python (basic)

Back-End: .NET, ASP.NET Core, REST API, Entity Framework Core, JWT, CRUD, Layered Architecture

Databases: SQL Server, PostgreSQL, Supabase

Tools: Git, GitHub, Postman, Swagger, Visual Studio, VS Code

Cloud: Azure (fundamentals)

Automation/AI: N8N, Webhooks, System Integration, AI Automation

PROJECTS

NexusAPI — API Aggregator | ASP.NET Core / .NET, REST API, System Integration

- Built a web service that unifies multiple external APIs into a single endpoint, simplifying data consumption for client applications.
- Designed a scalable integration architecture applying REST API principles and layered organization for easier maintenance and expansion.

Login and Registration API | ASP.NET Core, JWT, Entity Framework Core, PostgreSQL, SQL Server

- Developed a layered REST API with JWT-based authentication and authorization, ensuring security across the user lifecycle.
- Implemented full CRUD operations with Entity Framework Core, applying data persistence best practices.

Intelligent AI Automation | N8N, Generative AI, REST APIs, Webhooks, JSON

- Created automation workflows with AI agents and natural language processing (LLMs) to integrate multiple services via webhooks and REST APIs.
- Automated repetitive tasks and business processes, reducing manual effort in JSON data handling.

2D Unity Game | Unity, C#, OOP

- Implemented movement system, enemy spawning, HUD, and level progression applying Object-Oriented Programming.

PROFESSIONAL EXPERIENCE

Commercial Analyst — Junta Seguros

Feb 2023 – Present

- Analyzed commercial indicators and large data volumes using SQL, Tableau, Salesforce, and Oracle/Oracle RAC.
- Built decision-support reports and optimized internal processes, acting as a liaison between business and technology teams.

EDUCATION

Software Engineering — UniBrasil (In progress)

Technical Degree in Administration (Completed)

CERTIFICATIONS

Azure Workshop • Advanced Excel • Front-End Development

LANGUAGES

Portuguese — Native | English — Intermediate (technical reading and professional communication)
